

EVBOX Powering Our Sustainable Future

James Fox
SVP, EVBox NA

Can you share some information about the company's history and how the company became headquartered in Illinois?

EVBox was founded in 2010 and has since grown to become a leading global provider of electric vehicle (EV) charging solutions. Our journey began in the Netherlands, where we established our headquarters and developed innovative charging technologies, including charging stations and charging management software. Over time, we expanded our operations internationally, and as part of our growth strategy, we established a presence here in the United States. After careful consideration, we chose Libertyville, Illinois as our U.S. headquarters due to its central location, strong infrastructure, and commitment to sustainable initiatives.

We're currently operating at a state-of-the-art 60,000 sq. ft facility on the Innovation Park campus in Libertyville, and producing over 200 DC fast chargers per week. As a growing organization, we couldn't be more excited to be part of the community and help strengthen local production and employment. Our new location also places us in closer proximity to our American customers – allowing both communication and production to be quicker, smoother, and more environmentally friendly.

What services does the company provide?

EVBox offers a range of services to support the transition to electric mobility. Our primary focus is

on designing, manufacturing, and delivering high-quality EV charging stations and associated hardware. We provide AC and DC charging solutions for various settings, including workplaces, commercial buildings, and public spaces. Because our hardware is software agnostic and OCCP compliant, we make it easy for businesses and organizations to monitor, control, and optimize their charging infrastructure. Most importantly, our charging solutions allow businesses to enter the market without barriers and scale their offering as demand for EV charging grows.

We set ourselves apart from other EV charging companies with our flexible and scalable EV charging solutions, our reliability as a business partner, and our extensive international experience. To date, we've shipped over 500,000 charging ports to our customers and partners in 70 different countries worldwide.

What is the company's vision, mission, and values?

We have now entered a new era of mobility: one where electric vehicles have shifted from a niche technology to an agent of change in society. EVBox was founded to shape the EV revolution. Our vision is to create a sustainable future of transportation by accelerating the adoption of electric vehicles. Each and every day we're focused on building a world where electric mobility is the new normal. Our mission is to empower businesses, cities, and individuals to transition to electric mobility seamlessly.

In terms of values, we prioritize sustainability, innovation, and customer satisfaction. We strive to minimize our environmental impact by promoting clean transportation solutions. We continuously invest in research and development to stay at the forefront of EV charging technology. Moreover, we value our customers and aim to deliver excellent service, ensuring their EV charging experience is smooth and hassle-free.

Four core principles guide our organization:

- Enable the transition to Electric mobility
- Empower drivers to charge with confidence
- Fuel business growth
- Contribute to a sustainable future

What is the most important element of the company's success?

Without question, the most important element of our company's success is our people. Our dedicated team of over 700 professionals is crucial in driving our growth and innovation. Their expertise, commitment, and teamwork are the foundation of

our success. The same vision drives everyone who joins EVBox: to build a world where electric mobility is the new normal.

How does the company support the local IL community?

EVBox actively supports the Libertyville community and the wider region by engaging in various initiatives and partnerships that promote sustainable transportation and raise awareness about the benefits of electric mobility. For instance, we collaborate with local organizations to install charging infrastructure in key locations, such as public parking lots, shopping centers, and recreational areas. Furthermore, we participate in community events, workshops, and educational programs to share knowledge and encourage the adoption of electric vehicles. We're especially proud to have created over 100 new jobs in the immediate region by the end of 2023, with more growth coming. By actively engaging with the local community, we aim to contribute to a cleaner and greener future for Illinois residents.

Our vision is to create a sustainable future of transportation by accelerating the adoption of electric vehicles. Each and every day we're focused on building a world where electric mobility is the new normal.
