Illinois Chamber of Commerce President & CEO Todd Maisch's statement on (SB 1451):

"Illinois has tremendous potential to lead the nation in tech innovation. By having better network connectivity, SB 1451 will help Illinois businesses attract and retain jobs while also keeping consumers connected. It's crucial we stay competitive with states like Indiana, Iowa, Texas and Florida – which have passed small cell legislation – to keep Illinois at the forefront of the cutting-edge tech industry.

We recognize there are many pro-growth policies and reforms Illinois still needs to enact. But, we must still acknowledge the growing demands for Illinois businesses and consumers, such as, their reliance on high-quality wireless internet."
